MOLSON COORS BREWERS

The Customer

Molson Coors are the World's fifth largest brewer and the UK's second largest brewer producing £2.9bn of famous brands as Carling, Cobra, Grolsch, Miller Lite and Worthingtons at three sites employing a total of 2,300 staff.

In recognising the opportunity that increasing emissions related legislation and regulation together with increased energy costs presented to the business, Molson Coors wished to develop and implement an effective Carbon Management Strategy.

How JRP Solutions helped Molson Coors

JRP Solutions were engaged and following the completion of a Plant Condition Survey developed an appropriate Carbon Management Strategy that included:

- Awareness training
- New Company Carbon Policy
- Energy improvement plans for all four sites:
 - Burton - Main Brewery
 - Burton - Maltings
 - Alton
 - Tadcaster
- Value at stake analysis
- Establishment of on-site Carbon Champions

Customer Benefits

- Cost avoidance
- Cost reduction of up to £5.7m
- Reduced CO₂ emissions of up to 56,000te per annum
- Legislative compliance

"Thanks very much, that hit the mark!" - Gordon Stirton, Head of QHSE, Coors Brewery
