The ESOS Opportunity by Jes Rutter:

Why Jes Rutter, a passionate energy professional with 30 years practical experience of working to reduce energy consumption, believes that ESOS is a significant step forward. [Link:](#)

ESOS or ISO 50001 – Comply or Fly?

ESOS or ISO 50001 - Which one is right for you? Will your organisation do the basics to comply with ESOS or take this opportunity to start an energy efficiency journey to achieve ISO 50001 compliance AND make significant energy savings. Following this simple flow chart may help decide your route. [Link:](#)

DECC – Guide to ESOS:

The latest guidance from DECC on who qualifies and how to comply. [Link:](#)

Summary of JRP ESOS research findings:

In a recent survey carried out by JRP Solutions, 88% of respondents said that they didn't have enough knowledge about ESOS, 60% felt that ESOS is an inconvenience and just another layer of bureaucracy with 56% saying that ESOS is a well-intentioned scheme but unlikely to achieve real energy savings. New ESOS software tool that identifies 50% more savings:

In anticipation of soaring demand for cost effective and efficient energy surveys with the recent launch ESOS, energy efficiency specialists, JRP Solutions, have developed a unique software tool which has been designed exclusively to carry out these energy surveys. Energy Initiator® uses a systematic method of surveying the constituent parts of a manufacturer's infrastructure in order to provide an intimate understanding of how and where energy is currently being used throughout a site or business and to identify how and where energy consumption may be reduced. Train to become a 'Low Energy Company':

Your organisation's employees can be your most powerful asset in achieving and sustaining energy and cost savings. A new company-wide 'energy aware' accreditation scheme offer companies a powerful way to tell customers, staff and all stakeholders that they are a responsible organisation and that they take energy efficiency seriously.
