

PRESS RELEASE

Wells & Young's To Get Their Energy Bang On!

Bedford based brewer Wells & Young's have appointed energy specialist, JRP Solutions to help reduce the impact of rising energy prices.

Wells & Young's are the UK's largest privately owned brewer of famous beers such as Courage Directors, McEwan's and of course Wells Bombardier which has featured in a t.v. advertising campaign featuring comedian, Rick Mayall.

Engineering Manager, Andrew Keating commented "We have engaged JRP Solutions to help our business reduce its energy consumption, reduce costs and improve our sustainability.

JRP's Energy Manager Service offers our business access to a broad range of skills and the flexibility to adjust to the changing needs of the business".

JRP Managing Director, Jes Rutter welcomed the appointment adding "Like many businesses Wells & Young's face escalating energy prices in an already challenging economic environment and key to maintaining their competitive advantage is the effective management of their energy needs. Our Energy Manager Service provides them with exactly that without incurring the cost of employing a full time Energy Manager."

Further information is available from JRP Solutions via www.jrpsolutions.com or tel. 01454 299175

PROFILE:

Jes is a recognised UK expert in improving the effectiveness of energy utilisation of, in particular, steam and compressed air-derived energy within industrial process environments.

Jes Rutter has 29 years' experience in the Energy Management sector much of which has focused upon the analysis, effectiveness and improvement of energy generation and utilisation. His advice has been sought by a diverse range of businesses from across numerous industrial sectors as well as NHS Trusts and Local Authorities.

Jes's expertise has been successfully used to develop and implement practical tailored solutions for and on behalf of numerous blue-chip multi-national businesses. Most recently, he has helped Rolls-Royce to implement FM and energy solutions valued at £40M per annum and since 2003 have reduced their energy consumption by 20% against a backdrop of a 40% increase in production.

With a Degree in Energy Engineering Jes developed his practical experience by working with a number of large Contract Energy Management businesses building an unrivalled level of expertise in energy generation, utilisation, analysis and reporting.

Jes also developed a deep understanding of Contract Energy Management and Facilities Management successfully negotiating numerous high value Agreements before the 'poacher turned gamekeeper' used his unique expertise to develop and negotiate outsourcing and in-sourcing strategies for an impressive portfolio of blue chip clients.

Jes lives by his motto 'work hard, play hard' which he brings to life playing the drums, organising music festivals, race walking and the odd well deserved holiday.
